PROFESSIONAL SUMMARY

Computer Science graduate with strong interest in about building scalable and intelligent systems that solve real-world problems. Experienced in developing RESTful APIs and modular applications using Python (Django) and C# (.NET), with practical application of test-driven development practices to ensure reliable and maintainable software. Skilled in integrating machine learning workflows into production-ready systems, with interests in backend engineering, AI-driven applications, and software architecture.

SKILLS

Programming Languages: Python, JavaScript, C#

Frameworks & Libraries: React, Django, .NET, Node.js, Tailwind CSS

Machine Learning Tools: scikit-learn, Seaborn, Pandas, NumPy, Matplotlib, TensorFlow (basic)

Databases: PostgreSQL SQL Server, MySQL, SQLite, MongoDB

Cloud & DevOps: Docker, Azure, Git, GitHub, RESTful APIs

Collaboration & Project Tools: ClickUp, Microsoft Teams, Jira, Discord

Core Competencies: Data Structures, Algorithms, Object-Oriented Design, Modular Architecture, API Integration, Agile Development

EDUCATION

Maseno University

BSc, Computer Science

Expected Nov 2026

Kisumu, Kenya

PROFESSIONAL EXPERIENCE

Software Developer Intern | *React.js, Tailwind CSS, Python, C#, .NET Core, PostgreSQL, EF Core, SQL Server*

May 2025 – Aug 2025

Agile Business Solutions Limited

Nairobi, Kenya

- Collaborated with senior developers in the development of full-stack systems with React frontend and .NET Core backend, emphasizing modular and testable service architecture.
- Implemented role-based authentication and secure JWT-based APIs, ensuring predictable and auditable access control.
- Optimized cloud-hosted solutions, reducing system latency by 30% while maintaining deterministic behaviour across environments.
- Participated in Agile sprints, peer code reviews, and systematic unit testing to uphold engineering precision and code reliability.

Technical Lead - PODEx – Educational Platform | *React, Django, AI/ML*

April 2026 - Present

Maseno University

Kisumu, Kenya

- Leading the design and development of an AI-driven educational ecosystem that identifies learners' potential, maps dreams, and recommends personalized opportunities.
- Architecting a scalable, modular system using React (frontend) and Django REST Framework (backend) with secure JWT authentication and role-based dashboards.
- Integrating machine learning models for predictive analytics on student performance and potential analysis.
- Managing cross-functional collaboration through Agile sprints and GitHub version control.

Technical Lead – FiSH (Farmers Intelligent Support Hub) | *React, Django, ML*

Nov 2025 – April 2026

Maseno University

Kisumu, Kenya

- Led the development of a production-ready intelligent aquaculture system for fish farmers, integrating feeding management, growth monitoring, and disease detection modules.
- Built scalable REST APIs using Django REST Framework and implemented secure authentication, scheduling workflows, and real-time notification systems.
- Developed machine learning workflows for fish disease prediction and growth analysis using structured farm and environmental data.

- Designed intelligent feeding features including session tracking, feeding history, automated reminders, and feed recommendation logic.
- Coordinated Agile development workflows using Git and GitHub, maintaining modular architecture, clean code practices, and collaborative version control.

LEADERSHIP & INVOLVEMENT

Organizing Secretary – Ajira Digital Club

Sep 2024 – Aug 20225

Maseno University

Kisumu, Kenya

- Coordinated workshops and events on digital skills for over 200 students.

Organizing Committee Member – Western Region Research and Innovation Consortium (WRRIC)

Maseno University

- Contributed to the successful organization of the WRRIC innovation event bringing together researchers, innovators, and students from multiple universities across Kenya.
- Assisted in coordination, event logistics, and participant engagement during the consortium activities.

Member – Maseno Centre for Applied Artificial Intelligence (MCAAI)

- Participating in applied research exploring AI and machine learning solutions for real-world challenges in education, agriculture, and health.
- Contributing to ongoing projects on AI-driven data analytics and predictive modeling.
